ABOUT ME

Dedicated second-year undergraduate pursuing a B.Sc. (Hons) in Information Technology, specializing in Software Engineering, with a strong foundation in software development and a keen eye for detail. I have developed strong analytical thinking, communication, and teamwork skills. I also possess a solid understanding of delivering stable, high-quality software. With a positive attitude and a passion for continuous learning, I am committed to enhancing my skills and contributing to improved product reliability and user satisfaction.

EXPERIENCES

Internal Audit Trainee - Tasma International Manpower supplier PVT LTD

Dec 2024 - Jan 2025

Worked as an Internal Audit Trainee, supporting audit activities to evaluate and improve the effectiveness of financial and operational processes within the organization. Assisted in examining financial records, verifying accuracy, and ensuring compliance with company policies and regulatory requirements. Contributed to the preparation of audit documentation and reports by gathering relevant data and analyzing findings. Identified process gaps and inefficiencies, and supported the team in recommending practical improvements. Collaborated with senior auditors and different departments to promote transparency, accountability, and effective internal control systems.

EDUCATION

Sri Lanka Institute of Information Technology

B.Sc. (Hons) in Information Technology specializing in Information Technology

March 2024 - Present

(Will be completing by 2028)

Urubokka National College - Urubokka

G.C.E. Advanced Level (2023) - Commerce Stream

G.C.E. Ordinary Level (2020)

Jan 2015 - Jan 2024

3C

4A, 2B, 3C

PROJECTS

- Second Year IT Project -

Ongoing

MotoTrade - Web based Car Sale Management system

- Currently developing a web-based car sales system, Moto Trade, designed to facilitate the buying and selling of both branded and second-hand vehicles. The platform enables users to browse listings, post vehicles for sale, and interact with a user-friendly interface for seamless transactions.
- Integrated an AI-powered agent to provide personalized car recommendations based on user preferences and requirements. Involved in designing system features, developing core functionalities, and ensuring an efficient and intuitive user experience.

MotoHub - Mobile Based Vehicle Service Management System

- Currently developing a mobile application, MOTOHUB, designed to enhance interaction between vehicle owners and service centers. The app allows users to locate nearby service centers, book appointments, and manage vehicle service records efficiently.
- Focused on creating a user-friendly interface and implementing core functionalities to streamline communication and service management. Involved in the design, development, and continuous improvement of the application to ensure a smooth and reliable user experience.

Web Based Vehicle Spare Parts Management System

July 2025 - Oct 2025

- Developed a web-based system to manage real estate agents, property listings, and client interactions efficiently. Designed and implemented database schemas to handle property, client, and transaction data.
- Built CRUD functionalities for managing listings and user profiles, and implemented search and filtering features for improved usability. Utilized front-end technologies to create a responsive UI and ensured smooth data flow between client and server through RESTful APIs.

Web Based Real Estate Agent Management System

Feb 2025 - June 2025

- Developed a web-based system to manage real estate agents, property listings, and client interactions efficiently. Designed and implemented database schemas to handle property, client, and transaction data.
- Built CRUD functionalities for managing listings and user profiles, and implemented search and filtering features for improved usability. Utilized front-end technologies to create a responsive UI and ensured smooth data flow between client and server through RESTful APIs.

Aqua Guard - Smart Water Tank Management System

Jun 2024 - Oct 2024

- Designed and implemented an IoT-based solution, Aqua Guard, to monitor water quality and environmental parameters in real time. Integrated sensors (e.g., water level, pH, turbidity) with microcontrollers to collect data.
- Developed data transmission using IoT protocols and displayed real-time analytics through a web/dashboard interface. Implemented basic data processing and alert mechanisms for abnormal conditions, focusing on automation, reliability, and real-time monitoring.

CERTIFICATIONS & ACHIEVEMENTS

Introduction to Microservices

SESC SLIIT

FractalX

SESC SLIIT

Python for Web Developers

UOM Open Learning Platform

Agile Project Management

UOM Open Learning Platform

AIML Engineer

SLIIT Open Learning Platform

Front end Development

UOM Open Learning Platform

Server Side Development

UOM Open Learning Platform

TECHNICAL SKILLS

Web Development - React | HTML | CSS | Node | ReactNative

Programming Lan - PHP | C | JavaScript | Java

Databases - MySQL | MSSQL | MongoDB

Other Tools & Technologies - Git | GitLab | FractalX | Figma

SOFT SKILLS

- Attention to detail
- Quality-focused mindset
- Team Collaboration
- Effective Communication
- Problem Solving
- Adaptability
